Safety First

Proper service and repair procedures are vital to safe, reliable operation of Go-Karts and Bumper Boats as well as personal safety of those performing repairs. Refer to your Service Manual for servicing and repairing information. Always use safe and effective methods. The Service Manual contains many NOTES, CAUTIONS and WARNINGS which should be followed along with standard safety procedures to eliminate the possibility of personal injury or improper service which could be damaging to your equipment or compromise its safety.

It is important to note that repair procedures, techniques, tools and parts for servicing Go-Karts and Bumper Boats as well as the skill and experience of the individual performing work vary widely. It is not possible to anticipate all conceivable ways or conditions under which Go-Karts and Bumper Boats may be serviced or to provide cautions to all possible hazards that may result. Standard precautions should be used when handling toxic or flammable fluids, and safety goggles or other protection should be used during cutting, grinding, chiseling, prying or any other process that can cause material removal or projectiles. J&J recommends use of safety goggles or approved glasses during all servicing.

All information contained in this Parts Guide is based on the latest product information and prices available at time of printing. We reserve the right to make changes at any time without notice. No part of this publication may be reproduced, stored in a retrieval system or transmitted, in any form by any means, electronic, mechanical, photocopying, recording, or otherwise, without the prior written permission of J&J Amusements, Inc. A Corporation of Oregon and FunParts Xpress. This includes text, figures and tables.

BEFORE SERVING

To eliminate unnecessary work, careful reading of the applicable section is recommended before starting to service a go-kart, . Photographs, diagrams, notes, cautions, warnings, and detailed descriptions have been included wherever necessary. Nevertheless, even a detailed account has limitations, a certain amount of basic knowledge is also required for successful work.

Especially note the following:

Dirt

Before removal and disassembly, clean the go-kart. Any dirt entering the engine or other parts will work as an abrasive and shorten the life. For the same reason, before installing a new part, clean off any dust or metal filings.

Tightening Sequence

Generally, when installing a part with several bolts, nuts or screws, start them all in their holes and tighten them to a snug fit. Then tighten them evenly in a cross pattern. This is to avoid distortion of the part and/or causing gas or oil leakage. Conversely when loosening the bolts, nuts or screws, first loosen all of them by about a quarter of turn and then remove them. Where there is a tightening sequence indication in this Service Manual, the bolts, nuts or screws must be tightened in the order and method indicated.

Torque

When torque values are given in this Service Manual, use them. Either too little or too much torque may lead to serious damage. Use a good quality, reliable torque wrench.

Force

Common sense should dictate how much force is necessary in assembly and disassembly. If a part seems especially difficult to remove or install, stop and examine what may be causing the problem. Whenever tapping is necessary, tap lightly using a wooden or plastic-faced mallet. Use an impact driver for screws (particularly for the removal of screws held by a locking agent) in order to avoid damaging the screw heads. It also may be necessary to apply heat to some parts held with locking compound.

Edges

Watch for sharp edges, especially during major engine disassembly and assembly. Protect your hands with gloves or a piece of thick cloth when lifting the engine or turning it over.

High-Flash Point Solvent

A high- flash point solvent is recommended to reduce fire danger. A commercial solvent commonly available in North America is Stoddard solvent (generic name). Always follow manufacturer and container directions regarding the use of any solvent.

Gasket, O-Ring

Do not reuse a gasket or 0-ring once it has been in service. The mating surfaces around the gasket should be free of foreign matter and perfectly smooth to avoid oil or compression leaks.

Liquid Gasket, Non-Permanent Locking Agent

Follow manufacturer's directions for cleaning and preparing surfaces where these compounds will be used. Apply sparingly. Excessive amounts may block engine oil passages and cause serious damage. An example of a non-permanent locking agent commonly available in North America is Loctite® Lock'n Seal (Blue).

Press

A part installed using a press or driver, such as a wheel bearing, should first be coated with oil on its outer or inner circumference so that it will go into place smoothly.

Oil Seal and Grease Seal

Replace any oil or grease seals that were removed with new ones since removal generally damages seals. When pressing in a seal which has manufacturer's marks, press it in with the marks facing out. Seals should be pressed into place using a suitable driver, which contacts evenly with the side of the seal, until the face of the seal is even with the end of the hole. Always use assembly oil or grease on lip (sealing edge) of any seal prior to assembly.

Circlip, Retaining Ring

Replace any circlips and retaining rings that were removed with new ones, as removal weakens and deforms them. When installing circlips and retaining rings, take care to compress or expand them only enough to install them and no more.

Cotter Pin

Replace any cotter pins that were removed with new ones since removal deforms and breaks them.

Lubrication

Engine wear is generally at its maximum while the engine is warming up and before all rubbing surfaces have an adequate lubricative film. During assembly, oil or grease (whichever is more suitable) should be applied to any rubbing surface which has lost its lubricating film. Old grease and dirty oil should be cleaned off. Deteriorated grease has lost its lubricating quality and may contain abrasive foreign particles.

Do not use just any oil or grease. Some oils and greases in particular should be used only in certain applications and may be harmful if used in an application for which they are not intended. This manual makes reference to molybdenum disulfide grease (MoS_2) in the assembly of certain engine and chassis parts. Always check manufacturer recommendations before using such special lubricants.

Replacement Parts

When there is a replacement instruction, replace these parts with new ones every time they are removed. These replacement parts will be damaged or lose their original function once removed.

Inspection

When parts have been disassembled, visually inspect these parts for following conditions or other damage. If there is any doubt as to condition of them, replace them with new ones.

Abrasion	Crack	Hardening	Warp
Bent	Dent	Scratch	Wear
Color change	Deterioration	Seizure	

Specifications

Specification terms are defined as follows:

"Standards": Show dimensions or performances which brand-new parts or systems have.

"Service Limits": Indicate the usable limits. If measurement shows excessive wear or deteriorated performance, replace the damaged parts.

Factory Service Manuals avalable.

General Order and Shipment Policy

J&J Amusements, Inc. appreciates our customers. We will do our best to provide quality parts and service. Your business is important to us so we want you to fully understand our policy guidelines. Remember they are only guidelines: questions, suggestions and even complaints are always welcome.

NEW ACCOUNTS: New accounts are welcome! Open account terms are available to customers upon credit approval. Contact us for a credit application. Please be sure to furnish accurate, complete, year round mailing and shipping addresses and phone numbers. Credit approval takes approximately 2 weeks.

OPEN ACCOUNT TERMS: Customers with approved credit applications are allowed net prices as long as payment is received within 30 days of invoice date. A late fee of 1 1/2% per month will be assessed to the balance on any past due invoice. In addition, if your account is 60 days past due can be placed on CREDIT HOLD UNTIL PAST DUE BALANCE IS RESOLVED.

VISA, MASTERCARD, AMERICAN EXPRESS: For your convenience we accept VISA, MasterCard and American Express. We never charge your credit card until we ship your order.

BANK WIRE: Please contact us for Bank Wiring instructions. E-mail: Accounting@jjamusements.com

ORDERING: It is important to order all parts by correct part number. This will speed your order and help eliminate errors. You may phone, fax or e-mail your orders.

Phone orders 1-800-854-3140 International orders call 1-503-304-8899
Fax orders 1-800-366-7505 International orders call 1-503-304-1899. To ensure accuracy, fax form in the back of this book must be filled out completely with customer number, bill to, ship to, phone number and shipping (ground, 2nd day, overnight, overnight Saturday, or truck line). Every line item must have the part number, quantity and description clearly printed.
E-Mail Orders: parts@funpartsxpress.com
Use our Online E-Mail Parts Order Form, e-mail directly to J&J: parts@funpartsxpress.com
HOURS: Business hours are 8:00am to 4:30pm Pacific Time Monday thru Friday. Fax and e-mail orders can be received 24 hours a day.

PRICES: J&J Amusements, Inc. makes every effort to offer competitive prices and to maintain pricing for the life of the annual catalog. In some cases, price adjustments must be made and J&J Amusements, Inc. reserves the right to change pricing without notice.

BACK ORDERS: Back orders are shipped automatically with the same terms as the original order. Back orders will be shipped ASAP unless you elect to batch all back orders for periodic shipment or cancel all back orders. You must notify J&J Amusements, Inc. in writing if you wish to utilize either of the above options.

SHIPPING: We will endeavor to ship all orders same day and do our best to follow your special shipping instructions. We normally ship orders under 150 lbs. by UPS. Larger orders will be shipped by freight lines.

COD SHIPMENT: Large orders shipped COD will be divided into two or more cartons. The total

COD amount will be pro-rated by value of each carton's contents. COD orders of $1,000 or more are shipped cashiers check only. COD charge per box is $12.00.

REFUSED COD SHIPMENTS: Our FULL restocking fee plus freight both ways, will be charged to your next order if you refuse a COD shipment.

BAD CHECKS: Any account having a returned check (for any reason) will be placed on COD cash only. To avoid legal action, the check must be redeemed by a certified check or bank money order and all returned checks will be charged a $25.00 fee. If legal action is necessary, the customer will be responsible for all charges incurred in collection.

URGENT PART ORDERS: UPO's should be submitted only when fastest service is required to provide individual customer satisfaction. UPO's are given highest priority handling by J&J Amusements, Inc. This order method should not be used for stocking purposes. All extra shipping and handling charges incurred will be charged to customer.

SHORTAGES: Must be reported at the time the package is opened - NO EXCEPTIONS. All orders are checked for accuracy after picking and are weighed to 1/10th of an ounce to give us three ways of checking.

HIDDEN DAMAGE: Must be reported at the time the package is opened - NO EXCEPTIONS. ALL BOXES AND PACKING MUST BE SAVED to receive credit for damages. We will pay shipping charges.

FREIGHT DAMAGE: If packages delivered by freight carrier arrive in broken or mutilated boxes or if shipments are incomplete, be sure the driver notes on your bill of lading. Claims against freight carriers are made by the recipient, not J&J Amusements, Inc..

RETURNED GOODS POLICY: A Return Merchandise Authorization (RMA#) is required for all returns. NO EXCEPTIONS. The RMA# must be displayed on exterior of return shipping carton. Only items authorized (listed) on RMA# may be returned. Obsolete and discontinued merchandise cannot be returned (current merchandise is that which appears in current annual catalog/price book). A 15% restocking fee will be charged on all returns, except for errors made by J&J Amusements, Inc. Freight will be paid by customer except for shipping errors caused by J&J Amusements, Inc. Returned merchandise must be in good resale condition, in original J&J Amusements, Inc. package (where applicable) and cannot be altered with customer labels, stickers, numbers etc.. Returned goods which do not have an RMA# will be refused.

WARRANTY RETURN POLICY: All warranty item returns must be authorized by the Warranty Department and have an assigned RMA# before any adjustment or credit will be given. The RMA# must appear next to the shipping label on all returned items for proper credit to be issued. All credits issued will be applied fo future purchases

TAXES: Prices in this book do not include your state, local, or other applicable sales taxes or any other taxes that may be required. The purchaser is responsible for all tax associated with purchasing goods and must take all steps required to pay directly all taxes due.

DOUBLE CHECK ALL PART NUMBERS AND DESCRIPTIONS BEFORE PLACING ORDER

Please call or e-mail us at parts@funpartsxpress.com, Toll Free at 1-800-854-3140 or 1-503-304-8899 for assistance.

Ordering Information

To Place An Order:

J&J & FPX makes it easy to place your order anytime. Send us a fax, e-mail or give us a call. All orders receive immediate attention and ship straight to your facility.

If you fax your order, it's very important to order all parts by correct part number. This will speed your order and help eliminate errors. You may phone your order using our toll free number, 1-800-854-3140 or fax your order to 1-800-366-7505. For customers outside the US, call 503-304-8899 or fax 503-304-1899. E-Mail, our address is parts@funpartsxpress.com

**NOTE ON FAX ORDERS: Fax forms in the back of this book must be filled out completely with customer number, bill to, ship to, phone number and shipping (ground, 2nd day, overnight, overnight Saturday). Every line item must have the part number, quantity and description.

Office Hours

Our offices are open to receive phone orders

Pacific	8:00am to 4:30pm
Mountain	9:00am to 5:30pm
Central	10:00am to 6:30pm
Eastern	11:00am to 7:30pm
Greenwich	4:00pm to 12:30am
Geneva	5:00pm to 1:30am
Buenos Aires	1:00pm to 9:30pm
Tokyo	1:00am to 9:30am
Sydney	2:00am to 10:30am

Return Policy

- ABSOLUTELY NO RETURNS PERMITTED AFTER 30 DAYS
- RMA NUMBER REQUIRED FOR ALL RETURNS, ALL ITEMS RECEIVED WITHOUT RMA NUMBER DISPLAYED ON OUTSIDE OF PACKAGE WILL BE REFUSED
- NO RETURNS WITHOUT PRIOR AUTHORIZATION

Ordering Procedures:
Follow these simple guidelines, whether you Call, Fax or E-mail.

When you call, please have:
1. Your customer number
2. Item number and description

Current Parts Manual for quick reference

When you fax:
1. List customer number, phone number, and proper bill to and shipping address.
2. List quantity, item number and description clearly
3. Note shipping method desired

When you e-mail:
1. List customer number and proper bill to and shipping address.
2. List quantity, item number and descriptions clearly
3. Note shipping method desired
4. List return e-mail address and phone number

Orders will ship UPS Regular if not stated otherwise.

WHY OUTERWEARS PRE-FILTERS? Save your filters/ longer time between changes!

The need for a pre-filter is apparent every time you take on the elements of your favorite sport. Whether that sport is racing on dirt or asphalt, or just plain cruisin' in your bitchin' street rod, your air filter takes a beating! OUTERWEARS PRE-FILTERS are just the answer!

OUTERWEARS are designed to keep the bigger particles of sand, dirt, clay and street debris from getting to, and clogging, the pleats of air filter elements. OUTERWEARS unique polyester material contains uniform micron openings. These openings allow air in, yet filter out the very elements that will eventually clog an air filter, keeping engines running smooth and clean!

Extensive dyno & flow bench testing has shown no critical loss in horsepower or air intake using OUTERWEARS PRE-FILTERS, JUST GREAT PROTECTION!! OUTERWEARS PRE-FILTERS are used and recommended by professional engine builders and race teams worldwide, and will help prevent needless engine wear and tear which will be obvious upon engine analysis during rebuilding.

SLIDING VANE HAND PUMP

Sliding Vane Hand pump model PA 210A.. This is a type of sliding vane pump. This is a cast iron pump that is intended primarily for the transfer of fuel oil, lubricating oil, gasoline and other non-corrosive liquids.

This HD sliding vane hand pumps provide a safe, convenient method of dispensing or transferring non-corrosive liquids from drums, barrels, tanks or vats. They are designed for easy, efficient operation in handling a wide range of liquids in industrial, construction and agricultural applications.

Rotary hand pump features:

- Positive displacement
- Self primiing design
- Low friction, chemically inert vanes
- Rugged, durable cast iron head/cylinder
- Handles Class I and Class II flammable and combustible liquids, FM approved.

Oil change kits from

BEST DEAL!
Oil Extractor
FPX - Electric operated.
#1-60-0130

Oil Extractor & Oil Change Kits will save you time and money!

Go-Karts largest expense:
TIRES, ENGINES & CLUTCHES.
Number one reason engines and clutches fail.
The lack of consistent oil changes.
Oil should be changed every 50 to 100 hours (Commercial/Go-Kart) use. That’s twice a week for some FEC’s

Do a complete oil change in less than a minute. No need to remove kart body or dipsticks. Change oil in 30 karts in 1 hour. Ask your mechanic how long it takes now. Will work on most kart.

Air Operated Oil Dispenser
Air operated oil dispenser makes oil changes fast and clean. This dispenser comes equipped with a 6.3 gallon tank and digital quart calibration valve meter with flex spout. Flow can be set at 1-26 quarts per minute with a typical accuracy of +/- 1.0% and repeatability of +/- 0.3%. Batteries are replaceable and retain calibration information in case of power loss. Shuts off at the tip and eliminates spillage. This unit is accurate down to .100 Qts. Accurate, Clean, Used at the factory!

Check out the new FPX Electric operated Oil Extractor:

- Industrial quality
- Operator can safely and quickly remove hot oil from any small engine.
- Waste oil is evacuated either through dipstick probes or Xpress Change Kit.
- No air needed to operate.
- Fast and accurate.

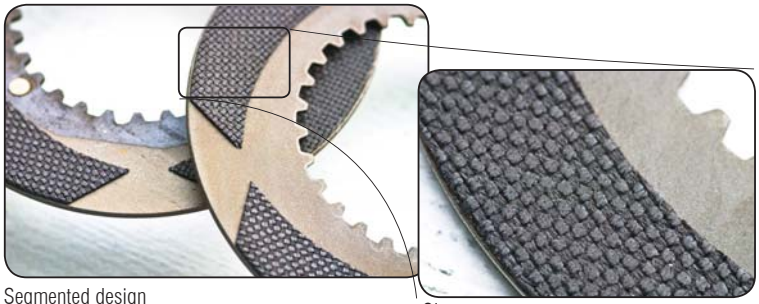
Years of on site confirmation, has proven that Cool-Tek is the most advanced product to enter our industry in decades. The great enemy of any clutch material is heat with sludge and foreign material a close second. To combat these wear elements J&J sought out the latest in high tech material and coupled this with a cooler running segmented design resulting in a truly revolutionary product. Words like “revolutionary” and “high tech” always get thrown around when new products come along but this time it just flat works.

We have tested the plates under extreme conditions, full load under full stall with the oil drained from the clutch housing. This drove outside case temperatures to in excess of 580 degrees F! Smoke pouring from all available orifices the system still worked. After short cool down the kart drove away with clutch functioning normally.

Under long term testing the clutch oil remained clean showing only slight discoloration even after extended periods of use. Sludge build up was minimal which should result in more run time between changes.
You have seen nothing like it, nothing else works like it.

Innovation - it’s what we do!



Segmented design

The simple, cost effective system for repairing or creating stronger threads.

Thread Repair Kits
Recoil thread repair kits contain a quality HSS tap, installation tool, precision stainless steel inserts and instructions, in a sturdy reusable container. Recoil has a full range of problem solving repair kits, available in single or multiple size format.

Inserts
Recoil stainless steel inserts are manufactured in a full range of thread forms and lengths and available in convenient replacement packets, or bulk.

Tooling
Features the simple Recoil repair kit installation tool for general maintenance use. Also offered is a wide range of semi-automatic, electric and pneumatic installation tools, High speed steel taps, and complete installation systems for production applications.

Now it's easy to set the speed of your entire go-kart fleet.

The Vortex Pro 1200 Kart Speed Gauge is a clean, simple, rugged instrument for measuring and setting kart speed from a spinning rear wheel. Based on a German-made Sigma Sport BC1200 cycling computer, it accurately displays current speed, with the ability to store maximum and average speeds and other functions as well. The Vortex can be used on either side of the kart, at speeds up to approximately 60mph (100kph). The auto-on and power save features ensure many months of use without changing batteries.

J&J's gas-powered bumper boat... The original still going strong!

BF2.3D Engine
Chosen for its reputation for dependable service, and its reduced emissions (less smoke and less oil in the water), this motor quietly performs. Initially designed for use in the corrosive marine enviroment, this dependable unit has been modified to be controlled from behind, and transformed to operate in bumper boat pond conditions.

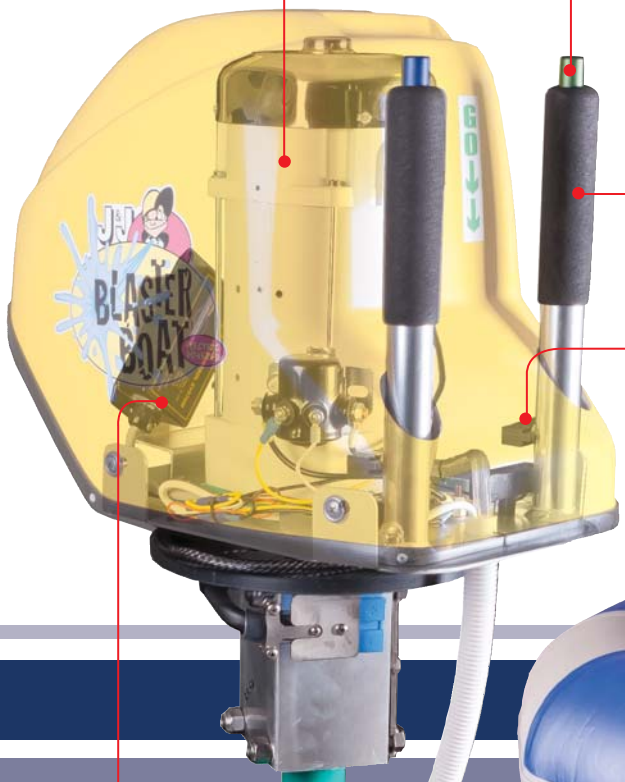
Fiberglass hull
This seamless, two-piece, fiberglass hull comes in an array of colors to choose from. Pick two colors from our extensive color list, and we'll build it. Match it up with an optional (standard on Blasterboat) Super Tube in your choice of two colors and we'll do the rest.

Hand rails
J&J is always concerned with safety, and we design our products with it at the top of the design criteria. With this in mind, we added the safety hand rails to the bumper boat hulls to allow safer and easier access into and out of the bumper boats.

Prop guard
Our prop guards are designed to allow maximum flow, while meeting the safety requirements of every known standard. Built to last in the most corrosive of enviroments, prop guards are made of stainless steel, then powder-coated to extend life and reduce electrolosis.

The best electric bumper boat ever!

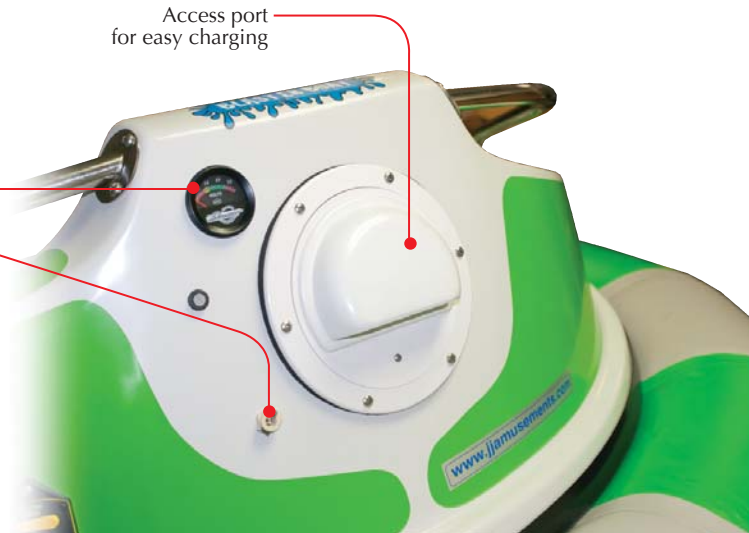
With electric power and a “water blaster” squirter, your customers will come back for more. All-day operation on a single charge!



3/4 horsepower, high efficiency, 24Volt electric motor with lowest amp draw in the industry
Color-coded go/squirt buttons
Heavy-duty aluminum handlebars with foam grips
Magnetic trigger
Remote shut-down (Standard on U.S. models only)
Powerful squirt pump

Stainless steel handrails & all stainless hardware
Super Tube II, A multi-colored tube built with a Urethane coated fabric
Heavy-duty fiberglass hull

Plastic prop just like most outboard motors. No corrosion, longer life!
Free-flow prop guard (powder-coated stainless steel)



Tired of customers ignoring pit lane speed limits?

Kartrol is a solid-state, electronic, engine speed limiter used on go-kart motors to reduce the engines rpm by remote control. This gives the track operator more control over the track enviroment, enabling him to reduce the speed of an individual go-kart, a group of go-karts, or all of the go-karts at will.

As an optional part of the system, the Kartrol pit generator can be mounted near the pit entrance to, when activated, reduce rpm of every go-kart that passes by, without affecting other go-karts on the track. This greatly improves safety in the pit area, for both the employees and patrons.

Kartrol locations on go-kart.

Command Console - Traffic Light Control

4897 Indian School Road NE
Salem, Or. U.S.A. 97305
1-800-854-3140 or 1-50-304-8899
www.jjamusements.com

What is the Command Console?

The Command Console is a state-of-the-art timing & message-delivery system with integrated kartrol housing that allows your attendants to maximize your returns while making the ride safe.

What does the Command Console do?

The Command Console allows your attendant to operate and control the ride from one central location. The console is an event-timing system that controls ride time and up to 5 *traffic lights. Has audio & video playback capability** for your pit area message, includes a PA amp with a hand-held microphone, and features an integrated Kartrol enclosure.

Your track attendant starts each session by depressing the green "go" button. The traffic-control circuit changes the traffic lights to green and accurately times the ride to a preset time.

If you need to slow the ride, the attendant simply presses the yellow button. The traffic lights* go to yellow. Kartrol*** equipped consoles also benefit from a second set of buttons that allow the attendant to control the go-karts. Pressing the yellow button on these consoles slows the go-karts to "crawl" speed, and pressing the red button allows for a complete stop of the ride.

When the ride is coming to an end, the system sends a signal to the traffic lights* to flash the yellow lights, and it emits an audible tone at the speakers** to alert the attendants and riders to prepare for the end of ride. After a few moments, the traffic lights will flash red until the next session is started.

If no ride is started for a designated time, the console goes into "sleep mode", and shuts down the traffic lights to save energy.

During the pre-ride, the console can play an audio or video** safety briefing for your customers. This message can be set to toggle or loop constantly. The console comes equipped with a generic audio message and with a professionally produced safety video: just hook up a few video monitors.

The Command Console is made to be outdoors year-round with its heavy duty enclosure.

System requirements:
120v 20 amp circuit (dedicated) for console and traffic lights.

* Traffic lights sold separately
** Speakers sold separately, video monitors not included.
***Kartrol is an optional accessory that can be integrated into the console for protection and centralized control of the ride.

GO-KART TRACK RELATED SIGN PACKAGE

Each go-kart track must have ledgible warning/safety and rules signs in place at the pit area where patron can read them.

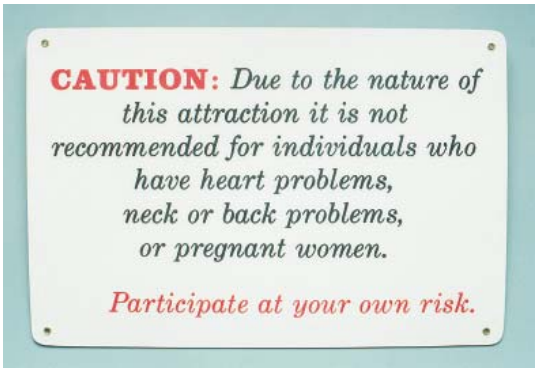
GO-KART RULES

Please Read Before Riding...

· (Single Seat Kart) Driver must be at least 58 inches (147cm) tall.
· (Double Seat Kart) Passenger must be at least 40 inches (101cm) tall and the driver must be an adult (at least 18 years old), or a parent.
· Shoes and shirt must be worn.
· No eating, drinking or smoking in go-karts or in track area.
· Fasten all loose clothing before entering the track area.
· Any hair that exceeds shoulder length must be secured above shoulder length.
· Keep both hands on steering wheel and both feet in go-kart at all times unless otherwise instructed by the attendant.
· Anyone assumed to be under the influence of alcohol or drugs shall not be allowed in track area.
· No running, pushing or horseplay allowed.
· Do not bump, skid or slide go-karts.
· Slow down when entering pit, wait for attendant's instructions.
· Seatbelts must be worn at all times.
· Riders must remain seated at all times when in go-kart.
· If any trouble develops, stay in your go-kart and raise your hand.
· Any misconduct or failure to follow these rules will result in immediate removal from the track area.
· This ride is not recommended for individuals who have heart problems, neck/back problems or pregnant women.
· Ask the attendant if you have any questions.
· We reserve the right to refuse service to anyone.
· Participate at your own risk.

THANKS FOR RIDING AND COME BACK SOON

J&J Amusements, Inc. - (503) 304-8899



CAUTION: Due to the nature of this attraction it is not recommended for individuals who have heart problems, neck or back problems, or pregnant women.
Participate at your own risk.

J&J Signs are made of tough weather resistant fiberglass made to withstand the abuse of day to day use at Entertainment Centers. All signs have the text laminated inside to prevent scratching.

IMPORTANT - Worn or damaged warning decals should always be replaced. Do not put into service any go-kart or bumperboat that does not have legible warning decals.

Complete kit comes with 5 signs listed in chart below.

Fpx#	Description	Price
KITKARTSIGN	Sign Package, Go-Kart Start Up	$598.94

00516	Sign, Go-Kart Rules (24x36) Spanish	$185.47
00515	Sign, Long Hair 16x9	$69.74

CLEANING GO-KARTS

CLEANING KART BODIES

The best way to preserve your go-karts' finish is to keep it clean by washing it often with lukewarm or cold water. Don't wash your kart in the direct rays of the sun. Don't use strong soaps or chemical detergents. Use liquid hand, dish or car washing (mild detergent) soaps. Don't use cleaning agents that contain acid or abrasives. All cleaning agents should be flushed promptly and not allowed to dry on the surface, or they could stain. Dry the finish with a soft, clean chamois or a 100% cotton towel to avoid surface scratches and water spotting.

NOTE: Do not damage warning decals. Damaged or illegible warning decals must be replaced immediately.

FINISH CARE

Occasional waxing or mild polishing of your karts may be necessary to remove residue from the finish. Use an approved fiberglass polish. 303 Protectant can be used on clean go-kart bodies to act as a UV protectant.

NOTE: Machine compounding or aggressive polishing on the body may dull the finish or leave swirl marks.

BODY TRIM

Silicone grease on body trims will make them last longer. Apply silicone grease with a clean cloth at least three times per season. During very cold, damp weather, more frequent application may be required.

FINISH DAMAGE

Any stone chips, fractures or deep scratches in the finish should be repaired right away. Minor chips and scratches can be repaired with materials available from almost any auto parts store. Larger areas of finish damage can be corrected by a local body and paint shop.

CHEMICAL SPOTTING & SUN FADING

Some weather and atmospheric conditions can create a chemical fallout. Airborne pollutants can fall upon and attack the surfaces on your kart. This damage can take two forms: blotchy, ringlet-shaped discolorations, and small irregular dark spots etched into the paint surface.

CLEANING FRAMES

Remove bodies weekly for frame cleaning and inspection.

Using a pressure washer, clean the entire frame of any dirt or grease that might have collected.

After spraying off the frame and wiping it dry, grease all the zerk fittings with good quality grease. Spray a rust inhibitor on all linkage rods, tie rod ends, springs or any unpainted surfaces.

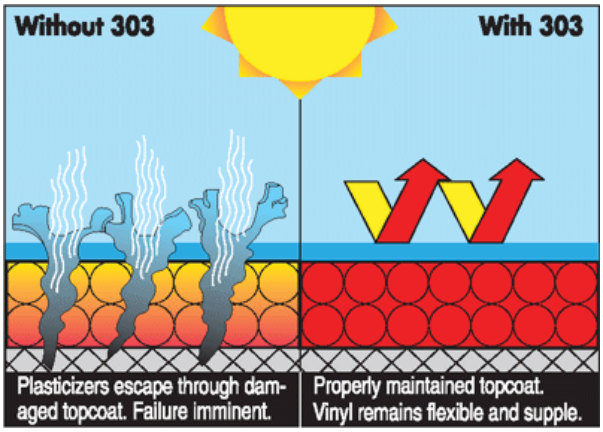
< WARNING >

Do not spray brake disc or caliper. This will cause a loss of brakes and could cause an accident.

CLEANERS AND PROTECTANTS

J&J carries many cleaning and protection products to keep your go-karts in top condition. From smaller spray bottles to 5 gallon containers of product, we've got you covered. Give us a call!

Bumper Boats & Go-Karts - Make them look better and last longer with 303.



Without 303
With 303
Plasticizers escape through damaged topcoat. Failure imminent.
Properly maintained topcoat. Vinyl remains flexible and supple.

An enlarged side view of common vinyl fabric would show raw PVC (polyvinyl chloride) covered by a thin layer of plastic called the “topcoat”. The topcoat is the part of the vinyl you can see and touch. To keep vinyl fabric soft and flexible, manufacturers add agents known as plasticizers to the raw PVC.

A major function of the topcoat is to hold in these plasticizers, which otherwise would quickly evaporate. If the topcoat is damaged or degraded, plasticizers begin to escape leading to embitterment, cracking, and failure.

Protecting the topcoat, then, is the most crucial aspect of properly maintaining vinyl, and is the subject with which vinyl manufacturers are most concerned. Vinyl manufacturers agree on and recommend the following:

General Cleaning: Never use household cleaners, powdered or other abrasives, steel wool or industrial cleaners, dry cleaning fluids, solvents (petroleum distillates), bleach or detergents. Use a medium-soft brush, warm soapy water, (such as Ivory soap), rinse with cool water and then dry.

Mildew Stains: To kill the bacteria creating the mildew, use a medium-soft brush and vigorously brush the stained area with a 4-to-1 mixture of water and ammonia; rinse with cool water.

Tough Mildew Stains: Apply a mixture of one (1) teaspoon ammonia, one-fourth (1/4) cup of hydrogen peroxide and three-fourths (3/4) cup of distilled water; rinse with cool water. Note: All cleaning methods must be followed by a thorough rinse with water.

Obviously abrasives should never be used on vinyl. Petroleum distillates are a universal “no no” for both vinyl and rubber.

Waxes should never be used on vinyl because (a) Most waxes contain petroleum distillates; (b) Wax is a build-up product, holding in the heat absorbed from the sun and accelerating heat damage.

Virtually all vinyl manufacturers agree that no type of oil should be used on vinyl. Silicone oil vinyl treatments should not be used for several reasons: 1) They typically attack the vinyl topcoat. 2) They usually contain no effective UV screening ingredients. 3) They are build-up products which accelerate heat damage. 4) Silicone oil formulations are greasy and oily, attract dust, and soil more quickly. READ THE LABEL! Product directions suggesting more than one coat for better cosmetic enhancement are build-up products and are not recommended by vinyl manufacturers.

303 FOR VINYL 303 Protectant is a beautifying liquid sunscreen, the routine use of which keeps vinyl looking like new while dramatically extending its useful life. 303contains no petrochemicals, silicone oils or petroleum distillates. 303 is not a build-up product, so treated surfaces dissipate heat normally.

303 is not oily or greasy and does not attract dust. In fact, 303 treated vinyl repels dust, dirt and stains, stays cleaner longer, and is much easier to clean when finally soiled. Since 303 contains a tested-safe-for-vinyl cleaner and is a cleaner, and protector combined, precleaners and precleaning usually are not required.

303 has been tested and is recommended by major vinyl and vinyl accessory manufacturers. As the leader in UV screening technology since 1980, 303 is the most powerful UV screening treatment available for vinyl, leather, rubber, gel coat fiberglass and most plastics. Regular use of 303 can reduce UV-caused slow-fade up to 100%.

BIG FOOT TIRES

Longest lasting Bigfoot ever made!

FPX FUN PARTS XPRESS
GO-KART & BUMPER BOAT PARTS

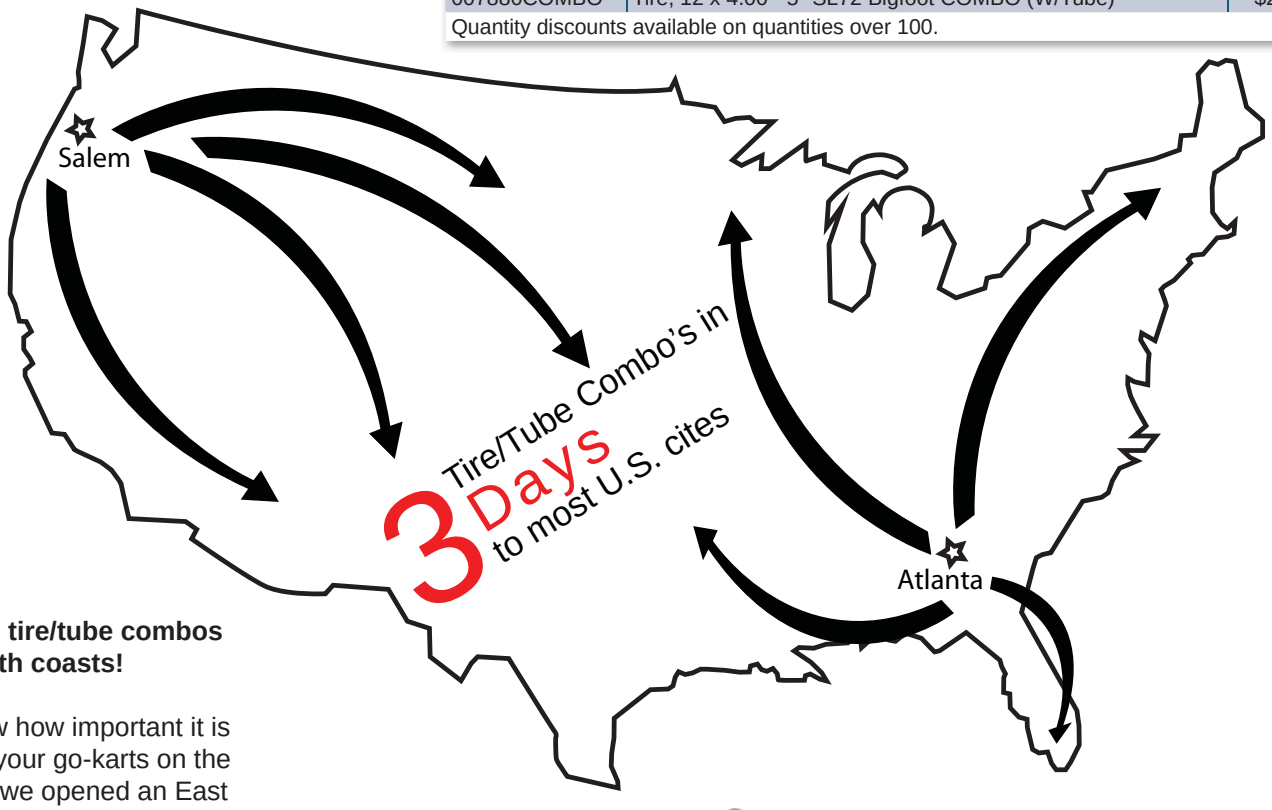
We stock so many tires we had to open up another warehouse on the east coast! That's right, we have a warehouse in Atlanta, Georgia and one at our headquarters in Salem, Oregon! What's that mean to you? It means you get the tires you need FAST and shipped for less!

Call today for your FREE price quote!

TIRES/TUBE COMBINATION DEALS		
Part #	Description	Price
007880COMBO	Tire, 12 x 4.00 - 5" SL72 Bigfoot COMBO (W/Tube)	$22.99
Quantity discounts available on quantities over 100.		



We ship tire/tube combos from both coasts!

We know how important it is to keep your go-karts on the track so we opened an East coast warehouse in Atlanta to suplement our West coast Salem, Oregon warehouse.

The Atlanta warehouse ships tire/tube combination deals only. We do not carry a full line of parts or other tires at this warehouse.

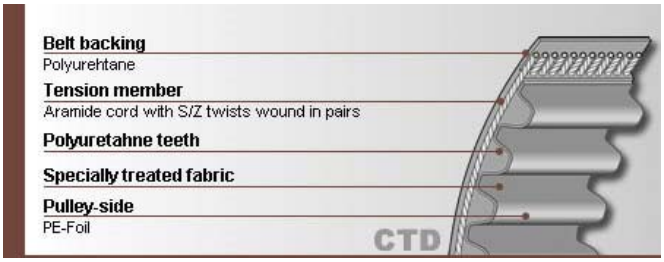
From these two shipping locations we can ground ship tire/tube combination deals to almost every U.S. city within 3 days.

We also ship world wide!

Tire/Tube combination deals include only tire and tube. Does not include wheels or lug bolts.

Go-Kart Drive Belts

FPX FUN PARTS XPRESS
GO-KART & BUMPER BOAT PARTS
A DIVISION OF J&J AMUSEMENTS, INC.



Gates new Poly Chain® GT® Carbon™ Belt. Nothing Tougher.

If you thought roller chain was your only drive option, think again. Gates new Poly Chain® GT® Carbon™ belt is part of a powerful synchronous belt drive system that outperforms roller chain in even the most demanding high-torque applications.

Gates Poly Chain® GT®2 belts have been replaced with Poly Chain GT Carbon belts. In most drives they serve as a direct replacement.

Fpx#	Description	Price
1-20-0076	Belt, Drive 8M-720-36 GTC	$90.51
1-20-0077	Belt, Drive 8M-800-36 GTC	$78.85
1-20-0078	Belt, Drive 8M-896-36 GTC	$79.05
1-20-0079	Belt, Drive 8M-1000-36 GTC	$98.99
1-20-0100	Belt, Drive 8M-1120-36 GTC	$97.91
1-20-0113	Belt, Drive 8M-800-18 Giga Torque GX (new for 2014)	$35.58

GROUNDS MAINTENANCE

FunParts Xpress carries many of the tools you'll need to keep your go-karts on track. Call us today to get your matenance facility equipped with all the essential tools you need.

Generators & Pressure Washers!
We got it all!

FPX Track Blaster

Imagine cleaning and drying your Go-Kart track in the time it takes to walk it.
Well, now you can with the Track Blaster from FPX!
We offer the most powerful walk-behind blower on the market today. The hurricane force wind is created by a Honda 13 hp or Honda/Robin 9hp commercial grade engines. The Track Blaster is capable of producing wind speeds of up to 180mph and over 2,400cfm which allows you to get the job done fast. The Track Blaster is easy to start and operate. Its large 15-inch pneumatic rear tires make pushing it a "breeze." There is also a self propelled version for tracks with bridges. The Track Blaster is great for all your cleaning and drying needs. Use it on your track, parking lots, or your landscape. With a throttle control arm, you can adjust the wind speed to fit any of these cleaning tasks. **Order yours today, and don't let the rain shut you down.**
